

Portfolio Activity 2

You will need to provide an annotated planning document that you have used for a real lesson or series of lessons showing how you have prepared and integrated the use of ICT to find things out in either a Maths or a Science lesson or both.

You will need to identify:

- The use of ICT to meet specific teaching and learning objectives
- Key questions and opportunities to stimulate learning
- How progress will be recorded
- How ICT is integrated into the organisation and conduct of the lesson.

Portfolio Activity 3

Choose one of the two activities listed below:

- 1 Create a resource, using ICT, to present information to the class or to a group.
- 2 Create a file for a database or spreadsheet, based on a topic or theme, that pupils can use in **Finding Things Out**. Identify the sources used to find the information.

Briefly explain how you created the resource and what its purpose was.

Explain how the resource was used in a real lesson and comment on any improvements that you would make if you carried out the same activity again.
