

You will be able to understand how to monitor and assess pupils' learning in Science when ICT is used and evaluate the contribution that ICT has made to the teaching of the subject by being able to:

A c t i o n s :

<p>identify criteria by which pupils can show what they have learnt as a result of using ICT resources</p>	
<p>observe and intervene in pupils' ICT-based activities in order to monitor and support the progression towards the learning objectives</p>	
<p>ensure that assessment of ICT based work reflects pupils' learning in the subject rather than the quality of the presentation</p>	
<p>determine the achievement of individuals when the product is a collaborative effort</p>	
<p>use formative and summative methods of assessing pupils' progress in Science and ICT</p>	
<p>ask key questions which require pupils to reflect on the appropriateness of their use of ICT.</p>
