

# Introduction

Welcome to the third unit, which looks at ways of **Developing a Teaching Repertoire**. This module is designed for teachers of pupils at Key Stages 3 and 4. It is one of three modules and focuses on **Using ICT in Science** to find things out, to communicate and exchange ideas and to try things out/make things happen.

The other two modules for Key Stages 3 and 4 focus on **Using ICT in Mathematics** and **Using ICT in English**

Please check the list below to ensure that you are happy with the following assumptions. If there is anything about which you feel uneasy please talk it over with your Tutor Mentor. He or she will be able to help you resolve any worries you may have:

- You have completed the **Face to Face Session**
- You have gone through the action plan for that unit and are able to understand and carry out the tasks yourself
- You have completed **Portfolio Activity 1** and it has been approved by your Tutor Mentor
- You have access, either at home or at school, to a computer that is connected to the Internet and can send and receive email and access the Internet.

This unit of work is the first of four self-study units that you will undertake by yourself or with a local group (such as other teachers in your school or in your training group).

There will also be an additional free-standing unit, **Know and Understand Information**.
