

Activity 1b

This activity is designed to provide a framework for you to practise using the criteria that you have agreed and make practical use of your checklist.

You will be working with other teachers, so that you can share ideas and issues with them as well as with your course tutor.

Make sure that you write down the ideas and notes to help you when you look at this task again after the session.

Look at the topic outlines provided on the sheet entitled **How ICT Supports Teaching Opportunities**.

In groups you will choose one and then, using the criteria checklist that you have been building, decide what contribution using ICT makes.

As a whole group, work with teachers from other groups and build up the rest of grid so that you can see where ICT could be used in all the examples.

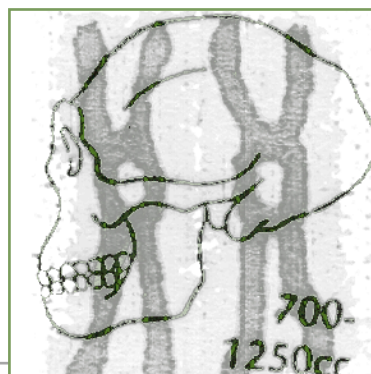

Always ask yourself:

Does it enable me to achieve my objective?

Is it the best resource?

hints

Outcomes

If there are any gaps in your grid, these can be filled in after the **Face to Face Session** is over. The evidence from this activity can be retained in your portfolio.
